best water technology

bestflush PLUS – Rapid bleeding and residual capacity display in one

3-way valve for bleeding

Measuring head for residual capacity

Display

- **bestflush PLUS, the ideal addition for all filter cartridges from water+more by BWT**
- **Simple bleeding**
- **Enables short flushing of filter cartridges**
- **100% use of filter capacity**
- **Food safe**
- **Saves water, time and money**

And also:

- **Reliable display of the current residual capacity – down to the exact litre**
- **Enables exact timing of filter cartridge replacements from water+more by BWT**
- **Maximal economic viability and the best possible water quality at all times**

bestflush PLUS is made up of two function elements integrated into a space-saving combi-device: a 3-way valve for effective bleeding and a measuring unit for reliable assessment of residual capacity displayed in the LCD display.

Simple bleeding

The bestflush PLUS 3-way valve made from food safe plastic enables simple commissioning and optimal performance of all filter cartridges from water+more by BWT. It ensures complete bleeding and can also be used for flushing filter cartridges if required.

During bleeding (flush setting) water flows into the filter cartridge in a controlled manner, flushes the filter media and forces the air out until no air bubbles emerge from the bleeding hose. bestflush PLUS makes bleeding child's play: quick, easy and complete for 100% usage of the filter capacity afforded by water+more by BWT filter cartridges.

bestflush PLUS – perfect monitoring of residual capacity

The bestflush PLUS measuring unit measures the flow and the time and uses these figures to calculate the precise residual capacity, which is then shown on the LCD display. With bestflush PLUS you always know how much optimal water you can extract from the machine before the cartridge needs changing. If the display flashes, your filter cartridge needs replacing. bestflush PLUS also saves additional data, e.g. relating to the last 5 filter changes and the entire flow and the operation duration. At the touch of a button you can call up data at any time and see just how efficient and economical the filter cartridges from water+more by BWT are.

Display unit

- **Up-to-date display of the filter residual capacity at all times**
- **Long cable for simple assembly at the eye-level of the user**
- **Intelligent electronics protects the battery**
- **Memory data protected during battery change**

bestflush PLUS – assembly

Filter cartridge

assembly on a filter head from water+more by BWT

For secure assembly, clip the bestflush PLUS on the plastic bracket provided with every filter head from water+more by BWT (cf. photo). The connection hose is available as an accessory for this purpose.

bestflush PLUS saves more

Minimal water consumption during bleeding to ensure air-bubble free operation. Note: Filter cartridges from water+more by BWT require no activation! With bestflush and filter cartridges from water+more by BWT, you can reduce your water consumption to a minimum. You save time and money

Connection hose (accessories)

Wall bracket

bestflush PLUS can be clipped easily on the wall bracket

Technical Data

Sensor unit	
Connection thread (IN/OUT)	3/8" nut x 3/8" external thread
Intake pressure (min./max.)	2–8 bar
Flow capacity	10–180 l/h
Pressure loss (up to 100 l/h flow rate)	0,2 bar
Flow rate deviations	+/- 5%
Water temperature (min./max.)	+4 to +40 °C
Ambient temperature (min./max.)	+4 to +30 °C
Dimensions (L x W x H)	77 x 43 x 46 mm
Installation position	Horizontal recommended
External display	
Splash water-proof	IP X4
Static memory	last 5 used capacities
Indicator	5 digits
Counter	Downwards from 99999 to -9999 l/min
Installation position	Vertical recommended
Dimensions (L x W x H)	62 x 50 x 17 mm
Cable	1,5 m, PVC 2 x 0,25 mm ²
Order number	FS00Y03A00

Scope of delivery:

- bestflush PLUS water meter with integrated 3/8" external thread x 3/8" flush valve with nut, external display for fixing on the wall

Order No.: FS00Y10A00

Accessories

- Hose 3/8" internal thread x 3/8" external thread (300 mm; optional)

Order No.: FS00Y13A00
